https://github.com/Omar123990/

Dedicated Junior Frontend Developer specializing in React.js and modern web ecosystem. Experienced in building responsive, high-performance web applications with complex state management (React Query) and clean UI/UX. Adept at translating designs into reusable components and delivering seamless, context-aware user experiences.

PROJECTS

ADSA (عدسة – عالم التصوير)

- Developed a responsive web application for the photography domain using React.js and Bootstrap, ensuring a mobile-friendly user experience.
- Architected a modular and reusable component-based UI, significantly improving code maintainability.
- Implemented seamless client-side routing and navigation utilizing React Router.
- Managed project deployment and hosting on Vercel for fast and reliable continuous delivery.

LAMMA | SOCIAL APP

- Built a fully responsive social media platform featuring Context-Aware Navigation and dynamic Dark/Light mode using React 18, Tailwind CSS, and HeroUI.
- Engineered robust state management and data caching using TanStack Query (React Query), significantly reducing unnecessary API calls and improving performance.
- Implemented complete CRUD operations for posts/comments with Optimistic UI Updates to provide zero-lag user interactions (likes, saves, follows).
- Integrated secure JWT Authentication and handled dynamic routing with React Router v6.
- Enhanced SEO using React Helmet Async for dynamic page titles and meta descriptions.

SKILLS

Technical Skills:

- HTML5, CSS3
- JavaScript (ES6+)
- React.js
- TanStack Query (React Query)
- HeroUI (NextUI)
- Bootstrap, Tailwind CSS
- React Router
- Git & GitHub
- API Integration (Axios / Fetch)
- JWT Authentication
- Deployment (Vercel)

EDUCATION

- Bachelor of Business Information Systems (BIS)
- First Year – Ongoing
