Alexandria, Egypt

SUMMARY

Passionate Frontend Developer eager to build real-world web applications using React.js and Next.js. Strong foundation in TypeScript, Tailwind CSS, and API integration with a focus on clean code and user experience. Motivated to learn, grow, and contribute to collaborative team environments. Currently exploring Backend development to become a well-rounded developer

EXPERIENCE

React Developer Trainee

Remote

Tech Master

Present

Software engineering & front-end training academy.

- Enrolled in an intensive 8-week program, engineering 6 production-ready React applications using Agile/Scrum methodologies and Git workflows.
- Developed 10+ complex UI flows incorporating React Router, JWT authentication, RBAC, Context API, Redux Toolkit, and REST API integrations (Axios/Fetch).
- Improved web performance by up to 30% and enhanced code maintainability by implementing modern React hooks, code splitting, and clean code practices.

EDUCATION

Backend Development (In Progress)

Route Academy

Frontend Development Diploma

09/2024 - 03/2025

Route Academy

Bachelor of Business Information Systems (BIS)

10/2025 - Present

Abu Qir Higher Institutes, Alexandria

SKILLS

State & Styling: Redux Toolkit, Context API, Tailwind CSS, Hero UI, Framer Motion, Responsive Design

Languages & Frameworks: JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, Next.js

Performance & APIs: SSR, SSG, Lazy Loading, Code Splitting, SEO, RESTful APIs, TanStack Query

Tools & Development: Git, GitHub, VS Code, Postman, Vercel, Netlify, Figma to React, AI-assisted development tools

PROJECTS

Luxury Movie Streaming Interface

https://cine-stream-murex.vercel.app/

Built a premium Glassmorphism-styled movie platform using Next.js App Router, integrating TMDB API for real-time media data. Implemented fluid animations with Framer Motion, SSR, and a portal-based search engine, achieving **90+ Lighthouse SEO and Performance scores**

Fresh Cart E-Commerce Platform

https://frish-cart-two.vercel.app/

Architected high-performance e-commerce platform using SSR and SSG, achieving strong SEO scores and fast load times. Implemented secure JWT-based authentication with protected routes and robust cart/wishlist state management using Context API and TypeScript for type-safe data flows

Social Networking Web App

https://lamma-app-amber.vercel.app/

Engineered a responsive social networking interface with real-time data sync using TanStack Query for caching and background refetching. Reduced layout inconsistencies by **40%** by designing a reusable component library with Tailwind CSS.
